New York, New York,

## Summary

---

Technical leader with years of experience in software engineering, architecture and launching new software to market.

## Experience

---

Bazaar Technologies - Jan 2016 - Present

**Co-Founder / CTO** - [accessbazaar.com](https://accessbazaar.com) - Python, Django, Postgres, Ios, Android, angular.js, react-native, Golang

I lead product development at a startup that simplifies the entire wholesale distribution process. We are a three-sided B2B marketplace that leverages technology in a way that has never been done before. We've built a platform to be a one stop shop that allows retailers to see multiple wholesalers, compare prices, product, and inventory to help retailers make the best purchase decisions for their businesses. I lead projects used to provide:

- Analytics to monitor your business
- Directly engage with wholesalers
- Browse product listings and make purchases
- Same day door to door delivery

Sevenrooms - Jan 2015 - Mar 2016

**Senior Software Engineer** - Python, Node.js, React.js, Django, webapp2, App Engine, Google HRD

- Established development workflow - practices such as code reviews, continuous integration and testing.
- Lead developer on tooling and build systems - allowing other developers to deploy code, run tests, etc.
- Lead developer on API architecture - authentication, security, middleware, etc.
- Lead developer on refactoring frontends into single page apps.
- Lead developer on several consumer facing products servicing the hospitality industry.

Nomi - 2013 - 2015

**Software Engineer** - Python, Tornado, MongoDB, knockout.js, durandal.js, angular.js

- Founding member of the engineering team.
- Lead developer for marketing attribution products.
- Team Lead for front end development team, and front end application architecture.
- Responsible for server configuration and deployment management.
- Wrote several Apis for retail metrics for various products.
- Managed offshore development teams

Zignage - 2011 - 2013

**Software Engineer** - Python, C, Django, Embedded Systems

- Designed embedded system(Kiosk) for use in Universities.
- Lead developer on video capture system for university classrooms.
- Developed a web application for university course management and video consumption.

NYC DOE - 2010 - 2011

**Coordinator**

- On site Coordinator for NYC school initiative - Mouse Squad - helping children get exposed to technology.
- Taught and created curriculum for students to learn HTML and basic javascript.
- Held workshops for teachers and parents, educating them about computers and their role in education.

Research Foundation CUNY - 2008 - 2011

**Research Assistant** - C, Java

- Wrote several pieces of software to compute results for research purposes.
- Wrote software to visualize operations on binary tree pairs.
- Talked at conferences and co-authored publications - [Average reductions between random tree pairs](#)

## Education

---

CUNY - City College of New York - 2005 - 2010

- Computer Engineering, BE
